

SEASONAL TREE CARE MUSTS YOUR WINTER CHECKLIST

If extreme wintry conditions affect your region, help your trees stay healthy this winter by following these tips below.

PRUNE

- Prune for shape, structure and health
- Remove dead, diseased or unsafe branches
- Prune oaks and elms per arborist instruction

INSPECT

- Inspect trees and shrubs for snow and ice damage
- Inspect trees and shrubs for insect and disease

SOIL CARE

- Fertilize trees and shrubs
- Keep rock salt away from trees
- Pre-treat turf and beds near surfaces where salt will be applied to reduce salt damage

PROTECT

- Wrap tree trunks to prevent cracks and damage from vermin
- Spray an anti-desiccant to reduce moisture loss in evergreens
- Gently remove snow from tree limbs
- Apply dormant oil to help protect against overwintering bugs and spring infestations
