

WINTER CHECKLIST

PLANT HEALTH CARE FOR EVERY SEASON

- Remove critical risk trees
- Fertilize trees and shrubs (as part of your normal annual program)
- Inspect trees and shrubs for ice and snow damage
- Cable, brace or remove weak limbs to prepare for severe weather
- Prune for shape, structure and health in addition to removing dead, diseased or unsafe branches
- Prune elms and oaks per your arborist's recommendation (where Dutch elm disease and oak wilt is a concern)
- Inspect trees and shrubs for insects and diseases, and treat appropriately
